Baso Rian Farhan Mallanti

Software Developer

Jakarta, Indonesia | +6282280372670 | rian.mallanti@gmail.com | LinkedIn | Github | Portfolio

SUMMARY

Fullstack developer with a background in **Computer Science Education and Software Engineering**. Completed the **Hacktiv8 Full-Stack JavaScript bootcamp** and now build end-to-end products at CarbonEthics, from Next.js and Laravel platforms to role-based internal dashboards and offline-first React Native field apps, while mentoring a small team of interns. Also experienced with Kotlin, Node.js, and PostgreSQL. Passionate about creating scalable and user-centric applications.

WORK EXPERIENCE

CarbonEthics — **Jakarta, Indonesia**

Fullstack Developer Associate Manager — *May 2025 – November 2026*

- Maintain and enhance CarbonEthics' bilingual (ID/EN) corporate platform (Next.js, i18n), interactive project map, AWS S3 media handling, automated Excel reporting, and Docker-based deployment.
- Led the migration of the public website from Wix to Next.js, mapping legacy URLs with redirects to preserve search rankings.
- Independently **designed and built** an end-to-end monitoring system, a Laravel API (30+ database tables) with role-based internal dashboards, **paired with two React Native** field apps and **replacing a manual Google Forms/Airtable workflow and eliminating field data loss from poor connectivity via offline-first sync.**
- Built a B2B client dashboard (Next.js) with interactive satellite maps, a planting progress timeline, a photo gallery, and downloadable reports and certificates.
- Led and mentored a team of 2 software development interns, overseeing task delegation, code review, and delivery timelines.

SMAN 4 Jeneponto — **Jeneponto, Indonesia**

Freelance Android Developer — *September 2024 – December 2024*

- Developed and maintained Android applications for school administration and educational purposes using Kotlin.
- Collaborated with teachers and staff to ensure the app met functional and user experience requirements.
- Ensured app compatibility across devices and provided documentation for future maintenance.

Dinas Ketenagakerjaan — **Makassar, Indonesia**

IT Support Intern — *December 2023 – February 2024*

- Assisted in **daily IT operations**, including troubleshooting network and system issues.
- Developed and implemented an **Android-based guestbook application**, streamlining the visitor registration process.
- Provided **technical support** for hardware and software issues across multiple departments.

EDUCATION

Hacktiv8 — **Jakarta, Indonesia**

Full Stack JavaScript Immersive Program (99 - Teacher's Award) (Transcript) — *Dec 2024 – Apr 2025*

Universitas Negeri Makassar — **Makassar, Indonesia**

Bachelor of Computer Science (Education) (GPA 3.86/4.00) — *2020 – 2024*

SKILLS

Languages: JavaScript, TypeScript, Kotlin, PHP, Python

Front-End: React.js, Next.js, TanStack, Redux, Zustand, Tailwind CSS, Jetpack Compose, React Native, HTML & CSS, Blade, Alpine.js

Back-End: Laravel, Node.js, Express, Sequelize, PostgreSQL, MongoDB, GraphQL (Apollo), Firebase, REST API, Redis, WebSockets, Socket.IO
Mobile: Kotlin (Jetpack Compose & XML), React Native (Expo, Zustand, WatermelonDB offline-first), Flutter
AI & Testing: Google Gemini API
Tools: Firebase Auth, JWT & OAuth, Git, Jest, Midtrans, AWS, XLSX (Excel), Breeze

PROJECTS

Finlog website
A personal finance & investment tracking platform (multi-currency, multi-user) combining transaction management, budgeting, and stock-market analytics with a technical screener – plus a secure Telegram bot for investment commands and personalized price alerts, and AI-assisted automation for social content generation.
Tech stack: Next.js, Supabase (PostgreSQL with Row-Level Security), Drizzle ORM, Claude AI API, Telegram Bot API, Vitest, Playwright, Recharts

Recipedia website
A recipe and nutrition platform that recommends recipes based on ingredients available in the user's fridge using AI-powered image recognition, with meal planning and nutrition tracking.
Tech stack: Next.js, NestJS, Prisma, PostgreSQL, Google Gemini AI, Redis, Supabase Auth

KostHunt
A boarding-house (kost) rental marketplace featuring location-based search with interactive maps, advanced filters, an admin analytics dashboard, and integrated online payments via Midtrans.
Tech stack: React, Node.js/Express, MongoDB, Redux, Tailwind CSS, Midtrans, Pigeon Maps, Excel (XLSX export)

Petani App – Monitoring System
An offline-first field data-collection app for a monitoring program, paired with a role-based internal dashboard for order tracking and automated reporting.
Tech stack: React Native, Laravel, MySQL, GPS/offline sync, PDF/Drive report automation

CarbonEthics Internal Dashboard
A role-based internal platform for planting locations, monitoring schedules, orders, vendors, and finance across six departments, with a REST API for the website and field apps.
Tech stack: Laravel, Inertia.js, React, Blade, Alpine.js, MySQL, Tailwind CSS

CarbonEthics Website & B2B Dashboard website
CarbonEthics' bilingual (EN/ID) public website, rebuilt from Wix in Next.js, together with a client dashboard where corporate clients track their mangrove restoration projects through a progress timeline, interactive satellite map, photo gallery, and downloadable reports and certificates.
Tech stack: Next.js, TypeScript, Tailwind CSS, next-intl, TanStack Query, Leaflet, Recharts, Docker, AWS S3, Laravel API

CERTIFICATIONS

Project Planning: Putting It All Together – Google via Coursera (Credential) *June 2026*
Mobile Application Development – Certificate of Competence, Jobhun (Credential) *December 2024*
The Complete Full-Stack Web Development Bootcamp – Udemy (Credential) *October 2024*
